VOLVO

THE NEW Volvo EX90

This is not just a new car.
This is a whole new Volvo.

2026

Volvo EX90 Highlights in more detail

Safety

- Cutting-edge exterior sensor .
- One of the first car makers to offer a two-sensor driver understanding system as standard.
- A full-cabin occupant sensing system to help drivers avoid leaving loved ones behind in potential danger.
- Standard, advanced interior and exterior sensing increases safety.

Software-defined

- From hardware-driven machines to software-defined mobility solutions.
- Intelligent tech powered by core computers.

New contextual UX

- Contextual approach – complexity made simple. UX showing what you need – when you need it.
- Upgraded and ultra-fast infotainment system, for a connected and seamless experience.

Versatile

- 7-seater fully electric SUV.
- Optimized comfort for all passengers.
- Flat floors allows for new ergonomics.
- Electrified third row.
- Front load compartment.
- Bi-directional charging to come in the future.

Design & Sustainability

- Flush aerodynamic exterior design for good looks and optimal range.
- Up to 797km WLTP range.
- Competitive energy consumption.
- Modern EV proportions translate into a coefficient drag down to 0.29– a competitive figure for a large 7-seater SUV.
- Progressive interior design.
- Increased traceability of battery materials through use of blockchain technology.
- Responsible sourcing and innovative materials.
- 13% recycled plastics
- Contains around 23% recycled steel.

VOLVO

This is not just a new car. This is a whole new Volvo.

Designed to be our safest car ever made with Safe Space Technology.

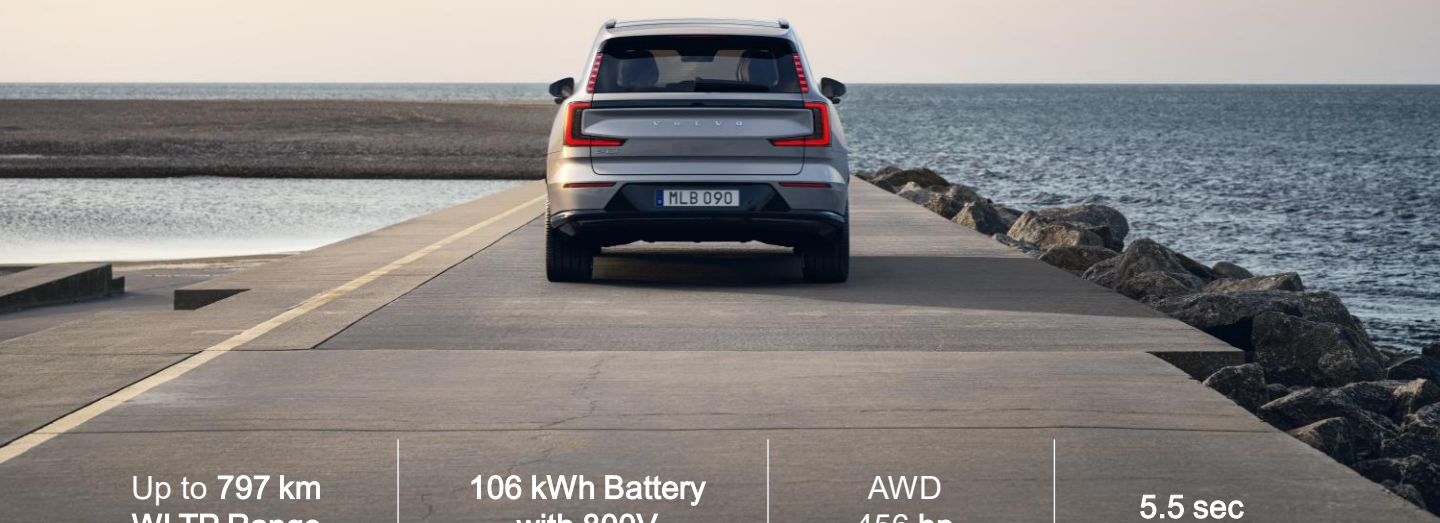

A redefinition of premium around digital and tech.

A radical evolution from hardware-driven machines to software-defined mobility solutions.

Flush, pure, versatile design signals prestige to the outside and supports well-being on the inside.

Standard, advanced interior and exterior sensing increases safety.

Complexity is made simple with contextual, personal user experience.

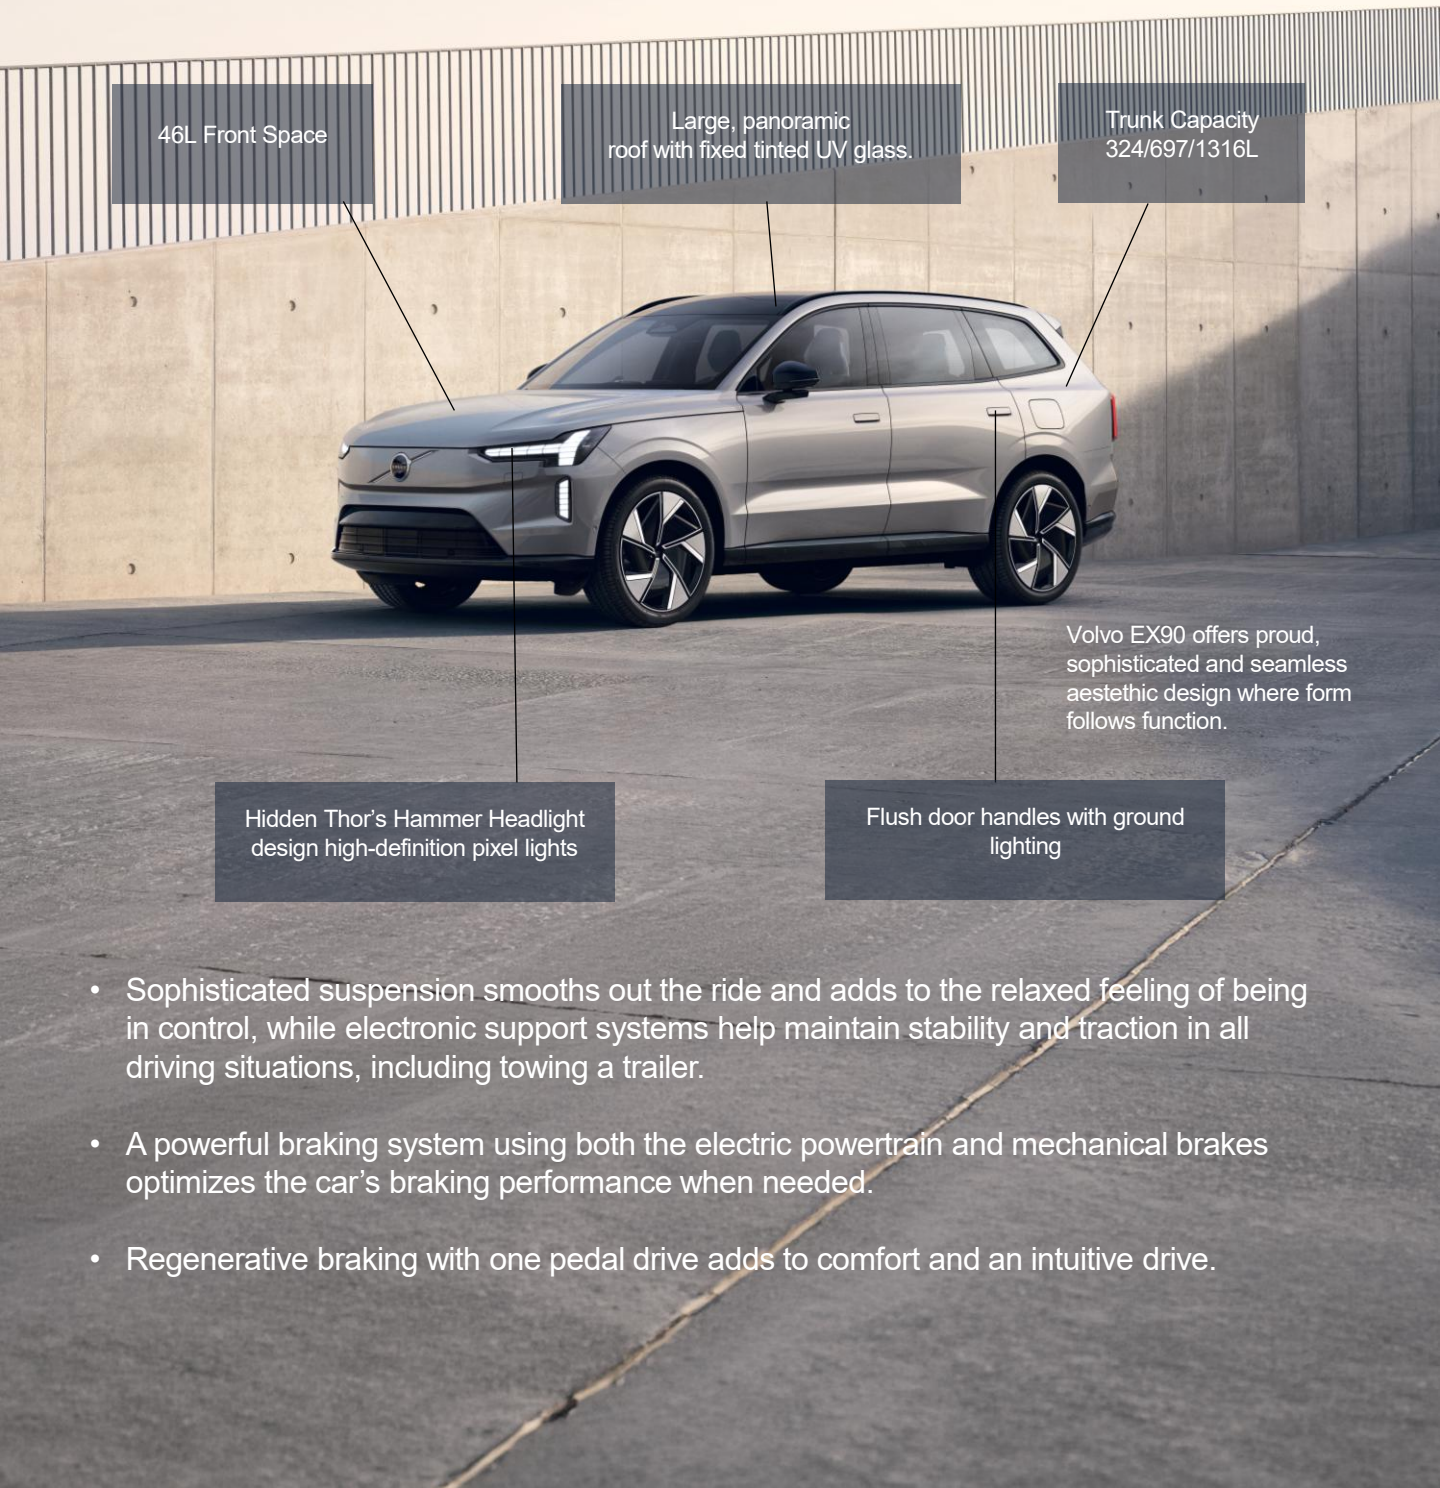

Up to **797 km** **WLTP Range** **(City range)**	**106 kWh Battery** **with 800V** **electrical System**	AWD **456 hp** **670 Nm**	**5.5 sec** **0-100km/h**

VOLVO

Driving experience

The compliant chassis is designed to give you the best driving experience.

- Sophisticated suspension smooths out the ride and adds to the relaxed feeling of being in control, while electronic support systems help maintain stability and traction in all driving situations, including towing a trailer.
- A powerful braking system using both the electric powertrain and mechanical brakes optimizes the car's braking performance when needed.
- Regenerative braking with one pedal drive adds to comfort and an intuitive drive.

VOLVO

To maximise the energy efficiency and range, the Volvo EX90 introduce a new wheel concept. We move away from the traditional pattern and introduce inserts on all wheels offered.

On top of the aerodynamic benefit, this reduce the metal weight in the wheel/car as well as the total running resistance.

The spokes go all the way to the centre of the wheel, so the wheel is perceived even bigger in size.

Interior design

To give customers a unique premium experience, Volvo Cars is taking the holistic meaning of well-being as a design starting point – leading to new breakthroughs in terms of modularity, versatility and sensory experience.

The Volvo EX90 supports Volvo Cars' Sustainability Ambitions

As sustainability is as important as safety to Volvo Cars, the new Volvo EX90 reflects our ambitions.

Fully electric

Volvo Cars long-term aim is to become a fully electric car company, and it also aims to reach net zero greenhouse gas emissions by 2040.

Going forward, Volvo Cars aims for 90 to 100 per cent of its global sales volume by 2030 to consist of electrified cars, meaning a mix of both fully electric and plug-in hybrid models – in essence, all cars with a cord.

The remaining 0-10 per cent will allow for a limited number of mild hybrid models to be sold, if needed. This replaces the company's previous ambition for its line-up to be fully electric by 2030.

Recycled Steel and Plastic

The Volvo EX90 contains the highest levels of recycled and bio-based plastics (13%) of any Volvo car to date. It also contains around 23% recycled steel. Steel and plastics are some of the most carbon intensive materials in our supply chain. Utilising recycled material helps reduce the vehicle's carbon footprint, as well as usage of valuable primary material.

Another first for the Volvo EX90: FSC Certification

All the wood inside the Volvo EX90 is FSC-certified, giving assurance that it has been sourced from responsibly-managed forests.
The vehicle is the first Volvo to be FSC-certified.

VOLVO

Estimated charging times

104kWh battery standard range
DC fast-charging 10–80%

- 250kW charging station: 29 minutes
- 200kW charging station: 31 minutes

AC charging 3-phase 11kW 0–100%

- 16A: 10 hours
- 10A: 16 hours

The smooth, powerful 800V electric powertrain of the Volvo EX90 is at the heart of the driving experience. The rear- wheel drive variant with a single electric motor on the rear axle provides balanced performance for all kinds of driving, still responsive and powerful to make driving fun and rewarding.
